MACHINISTS' UNION
OFFICER A BURGLAR

A special to the Denver News, from Raton, dated July 20, says:

John C. Walters, secretary of the International Machinists' Union at this place, was bound over today from his preliminary hearing, charged with burglarizing the home of Walter Fairbanks.

Walters gained an entrance by breaking through a screen window and after ransacking the house for some time was discovered.

He had no means of escape without being seen and identified, so crawled under a bed in an attempt to conceal himself until an opportunity of escape should present itself. His hiding place was discovered and he was "covered" with a weapon and search. Upon his person were a few things of small value belonging to the family.

He was immediately committed to jail, where he remained until his preliminary hearing, after which a \$1,000 cash bond was given for his appearance next term of the district court.

Walters has a wife and one child and therefore has been considered among Raton's best citizens. He is also a fine machinist and was employed at the Santa Fe shops at this place, but went out with strikers on May 2, 1904, and since that time has done little toward supporting his family. Another arrest is looked for at any time in connection with the case.

The other day one of the big bridges on the Arizona & New Mexico road between Guthrie and Clifton was burned. The bridge crossed a ravine between two tunnels. It is supposed that the fire was started by coals dropped from the freight engine. The passenger train was caught on this side of the fire, and has run regularly from the burned bridge to Hatchita, the passengers, mail and express being transferred. A large force of men were put to work immediately, and it is expected to have the bridge rebuilt so that trains can cross in a few days.

Phineas Bronson, perhaps the most prominent pioneer constructing engineer of the coast, died at his residence in San Francisco, aged 73. He built the San Francisco and San Jose railroad which was the first steam line west of the Rockies, in 1861. A year later the famous omnibus line, the first horse car system on the Pacific slope was built by him. He constructed the Pico street railway at Los Angeles, which was the first trolley system ever established on the coast and was the third trolley line in the United States.
